SMALL DOMESTIC APPLIANCES

GENERATION FUTURE

MORE THAN 100 YEARS OF EXPERIENCE

It is rare that a brand becomes synonymous with a product. It is even rarer that a brand remains in the forefront of design and technology within that product area for more than 100 years. It was in fact in 1908 that Hoover assembled the first vacuum cleaner in Canton, Ohio, to solve the problem of asthma generated by dust. The idea was ingenious and immediately became successful throughout the US and quickly also in Europe, thanks to a smart and very professional sales team. Since 1908, until now, we have continued to listen to the needs of our users and we have invested in new technologies, in design and in ergonomics to make lives easier and smarter.

INNOVATION, TECHNOLOGY AND DESIGN

We want you to trust us and be satisfied with our products for many years and when you come to renew, return to Hoover for the latest model. All our vacuum cleaners provide maximum cleaning performance, converting motor power into suction power in the most efficient way possible. So whichever model you choose, you know you clean better, faster with Hoover. Hoover is today a worldwide brand-leader in floorcare, washing, cooking and refrigeration, that constantly looks to offer to its customers, creative and innovative products, that meet today the standard of tomorrow. This is why our mission is "Generation Future". And in 2010 we have expanded into the Garment Care segment with an amazing new range of Ironing Systems and a unique patented technology of steam control. The history of innovation continues... Stay tuned.

HOW TO SELECT THE RIGHT PRODUCT

BEFORE YOU SELECT A NEW VACUUM CLEANER FOR YOUR HOME, SPARE A FEW MINUTES TO MAKE THE RIGHT CHOICES. THE MAIN ASPECTS TO CONSIDER ARE: TYPE OF FLOORING, SIZE OF YOUR HOME, PRESENCE OF ANIMALS, CASES OF ALLERGY. HOOVER OFFERS THE WIDEST SELECTION OF PRODUCTS TO GIVE YOU THE PERFECT SOLUTION TO YOUR NEEDS.

CANISTERS

Ideal for thorough cleaning of most floors and other surfaces, such as sofas and upholstery, and for all size of homes. They are light to carry around, they reach everywhere thanks to the flexible hose and its attachments. They come with a wide range of accessories for special needs (pet hair, carpets, rugs, etc). You need to allocate some space for storage.

STICKS

Ideal for frequent cleaning of hard flooring. They are ready to use and only need a small space for storage. If you find traditional corded sticks a bit heavy, choose a cordless version: they are designed for a quick and effective cleaning of smaller homes; they are lighter and very flexible to use.

UPRIGHTS

Ideal for carpet flooring. Thanks to the motorized brush-bar they clean thoroughly carpet floors. They come equipped with a range of accessories, all stored on board for immediate use, to clean, all soft furnishing and for the efficient removal of pet hair. Uprights are especially efficient at, cleaning large carpet areas, but because of their height they cannot easily be stored under a shelf, or in a box. Hoover also offers a special version for hard floors, called Floormate.

POLISHERS

Ideal for delicate hard floors such as marble, tile and parquet. They combine vacuuming with a polishing action using 3 rotating brushes located at the bottom of the foot. Polishers come with a set of different brushes to be used depending on the type of floors. Hoover offers the only polisher especially designed for parquet.

TANKS

Ideal for hard jobs, such as cleaning garages, balconies and working areas. Tanks are extremely versatile as they can vacuum either dry or wet debris. With their great capacity some tanks can be quite large, in which case they would normally need a dedicated storage area.

HANDHELDS

Ideal for quick spills all around the house. They are equipped with rechargeable batteries, and are normally hung on a wall with their charging base, so they are always ready to use. Hoover handhelds come in bright colours and elegant silver finish, to give a hint of design to your working areas.

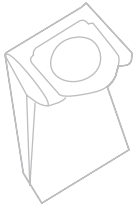

ROBOTS

Ideal for a daily cleaning, to reduce the effort when you do the weekly cleaning with your traditional vacuum cleaner. It keeps your floors clean from the little everyday dust, and gives a touch of design and technology to your home.

USER TIPS

DUST MANAGEMENT TECHNOLOGIES

AFTER HAVING SELECTED THE TYPE OF PRODUCT, YOU WILL NEED TO DECIDE WHICH IS YOUR PREFERRED WAY OF MANAGING DUST: DO YOU NEED A PRODUCT WITH A BAG OR WITHOUT? HERE YOU CAN FIND THE MAIN ADVANTAGE OF THE TWO TYPE OF TECHNOLOGIES.

BAG DUST COLLECTOR

Depending on the type of bag, you may have a different level of dust retention. We can define 3 types of bags:

PROS:

HYGIENE:

once dust enters into the bag, you have no further contact with it. A special sealing will automatically close the bag when you remove it from the cleaner, so no dust can exit.

HIGHER AIRFLOW:

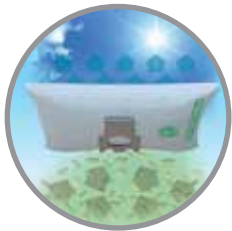

which is mainly needed to effectively clean carpets, rugs and removing pet hair.

IDEAL FOR ALLERGY SUFFERERS AND FOR PET OWNERS.

CONS:

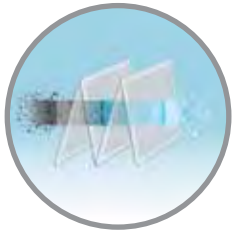

BAGS NEED TO BE REPLACED:

on average you will need to change the bag every 6/8 weeks.

HEPA BAG

They have up to 30 times more retention capability than standard bags, which results in no emission of dust. Some HEPA bags incorporate Active Carbon Filters for odour removal. They are ideal if you suffer from allergies.

PUREFILT BAG

They have 3 layers of filtration which helps reduce the proliferation of germs and bacteria.

PAPER BAG

Standard dust collectors. The more the layers, the better the dust retention.

BAGLESS DUST COLLECTOR

There are 3 technologies that differ for the frequency of maintenance, the drop in suction power and the amount of dust that you will get in contact with:

PROS:

NO NEED TO BUY BAGS:

so you save money and you don't have to worry about having spare bags.

CONS:

NEED TO BE CLEANED REGULARLY:

the dust container needs to be emptied on a regular basis. In systems based on filter separation, the filter has to be cleaned regularly to maintain suction power.

MULTICYCLONIC/AIRVOLUTION™

It is the most advanced technology and it is based on the action of many small cyclones that quickly separate air from dust, pushing the latter to the bottom of the dust container. Only minimum dust goes to the filter, which therefore needs minimum maintenance. Suction power remains high and constant, with no losses.

SINGLE CYCLONE

These systems are equipped with just one cyclone to generate the centrifugal effect. In this case the separation of dust from air is less effective and more dust will deposit onto the filter, requiring more frequent maintenance to keep a high suction power.

FILTER BASED

The separation is done by a large filter that sits in the centre of the dust container. Most of the dust will deposit on the filter and you will need to clean it regularly to maintain the suction of your cleaner.

USER TIPS FILTRATION

FILTRATION IS A KEY POINT OF VACUUM CLEANERS. BEFORE YOU BUY A VACUUM CLEANER MAKE SURE THAT ALL FILTERS ARE WASHABLE, FOR A LONGER LASTING CLEANER.

IN A BAGGED SYSTEM YOU HAVE 3 LEVELS OF FILTRATION:

The bag where dust is collected; the pre-motor filter; the exhaust air filter.

IN A BAGLESS CLEANER THERE ARE 2 LEVELS OF FILTRATION:

One pre motor and one for exhaust air.

FILTERS CAN BE OF TWO MAIN TYPES:

HEPA (HIGH EFFICIENCY PARTICULATE AIR):

Have the capability of capturing most harmful bacteria even of very small size.

MICRO FILTERS:

Can capture the most common dust typically present in the house.

Filters can come with a special treatment called Bactizero™ that reduces the proliferation of most common bacteria such as "staphylococcus aureus" and "escherichia coli".

DO YOU SUFFER FROM ALLERGIES? OR HAVE YOU GOT YOUNG CHILDREN?

We have managed to exploit the anti bacteria power of silver, known since ancient times, to develop a special treatment for plastics, called **silver ion**. This is used for bagless product dust containers and for **mini turbo nozzles**; it reduces 99,9% of bacteria colonization in 24h, for an healthier environment.

Hoover has developed a unique **allergy care package**, tested and approved by **IFMA** specially conceived to eliminate all allergens of dust.

If you suffer from allergies or have young children, **look for a product with HEPA Filter and Bactizero™ treatment** and either HEPA Bag or dust container treated with silver ions. This combination will help you to significantly reduce the risk of asthma and allergic reaction to dust.

"Environmental problems are not only a topic for scientific debates any more. It's something that all the world population cannot ignore*".

Hoover has accepted this challenge and has developed the widest offer of energy efficient products in the market, anticipating the future European directives in terms of energy labelling.

The starting point is good dust removal. With good dust removal you have the opportunity to take fewer passes with the vacuum cleaner. Fewer passes means that you will be using the vacuum cleaner for less time. Less time means less electrical energy is used. It is with its super efficient design that GREEN RAY™ brings together good dust removal with low power, this magnifies the energy saving.

THE GREEN RAY™ RANGE DELIVERS THE SAME CLEANING PERFORMANCE OF HIGH CONSUMING MODELS, BUT WITH REDUCED ENERGY CONSUMPTION, THEREFORE ACHIEVING UP TO 70% ENERGY SAVING.**

With just 1100W of power and less time cleaning, then you don't need to waste money in expensive energy bills. The Green Ray™ products also come equipped with the best in class kit of accessories* *:

**REINFORCED FABRIC HOSE FOR
MAXIMUM DURABILITY**

**PERFECT MULTISURFACE NOZZLE
FOR THE HIGHEST DUST PICK UP**

**TELEZOOM™ TUBE AND NAVIGATOR™
HANDLE FOR THE MOST
COMFORTABLE USE**

LOOK FOR THE GREEN RAY™ LOGO IN THE CATALOGUE, AND MAKE A SMART CHOICE.

*"The threat of climate change can't be contained by borders on a map and demands a global commitment." Barack Obama - July 10, 2009

** Depending on models

SPACE IS AN ISSUE FOR YOU?

Look for the products designed to save space both in use and in storage. There are compact canisters with Nanopack™ Evo system, stick with foldable handle and uprights with removable handle. No matter the product, Hoover has designed the right solution to help you save space.

HAVE YOU GOT A LARGE AND SPACIOUS HOUSE?

A spacious house may require a lot of time to be cleaned. But not with Hoover products, designed to deliver maximum performance and help you save time in cleaning.

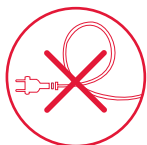

HAVE YOU GOT A LOT OF STAIRS IN YOUR HOUSE?

You dream of a light and easy to carry product when you go up and down the stairs cleaning them? As the surfaces' specialist, Hoover has the right products for you: they are light, compact, easy to use and carry.

DO YOUR NEIGHBOURS COMPLAIN ABOUT THE NOISE OF YOUR VACUUM CLEANER?

If you want to care for your house's surfaces without disturbing people around you, Hoover has got several products with special noise reduction technologies, and of course with no loss of performances.

DO YOU WANT TO MOVE FREELY AND EASILY WHEN CLEANING YOUR HOUSE?

Hoover rechargeable products allow you to clean without the obstacle of the cable and guarantee the best performances without any compromises.

DO YOU HAVE A GLOSSY FLOOR SURFACE?

To treat delicate surfaces as marble and parquet and bring them to their original brightness, Hoover has created specific products, designed to clean every treated surface without damaging it.

DO YOU SUFFER FROM ALLERGIES OR HAVE GOT YOUNG CHILDREN?

Allergy Care is the Hoover Kit created to drastically reduce the proliferation of allergens. Allergy Care lets you clean your house safely, removing dust allergens and making the air you breathe cleaner.

CONTACT WITH DUST IS AN ISSUE FOR YOU?

In principle you should choose a product with bag dust container, but Hoover has also developed bagless systems with easy empty mechanisms, to prevent unwanted contact with dust.

DO YOU WANT TO HAVE YOUR ACCESSORIES CLOSE AT HAND AND READY TO USE?

Many Hoover products are designed with accessories stored on board; so you can have them readily available whenever you need them. Finally a clever solution to the usual problem of lost accessories.

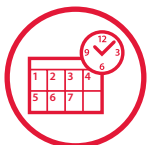

DO YOU NEED TO DRAW FLUIDS FROM THE SURFACES?

How often do you spill water at home? In order to draw fluids, Hoover has created specific products which guarantee excellent results also on delicate surfaces.

ARE YOU CONCERNED ABOUT LOSSES IN SUCTION POWER?

Hoover offers products with the best performances in the market. For maximum performance of a bagless product, look for models that guarantee no losses in suction power. This is normally achieved by combining multi-cyclones with high performing filters.

DO YOU WANT MORE FREE TIME TO DO WHAT YOU LIKE?

The new Robo.com² is the answer to your need because it cleans your house automatically taking care of your furniture and floors. Your life has never been so easy and comfortable.

ROBOT

AAI™ TECHNOLOGY

Robo.com² has been designed with the AAI™ Infrared Navigation, a new exclusive Hoover cleaning technology which uses a unique algorithmic calculation to decide the best path for the most effective cleaning of your house.

DUST SENSOR*

On dust detection robo.com² will automatically initiate cleaning cycle and will follow a square pattern.

INFO VOICE TECHNOLOGY*

Robo.com² communicates with you! It will tell you what it is doing and in case of a problem it will suggest you the best solution to solve it.

RUSH EXTRA

SOMETIMES SIZES DO MATTER

EXTRA LARGE BIN CAPACITY

66% more bin capacity allows collecting more debris and requires emptying less often. More time saved!

EXTRA LONG SUCTION POWER

Long lasting and constant suction power, even when the large bin is filling up. It gives you complete freedom of use in large houses always with the maximum power.

EXTRA RAPID BIN EMPTYING

And when it is time to empty the bin, you can do it in 2 seconds, using just one hand: press one button to release it, and pull the trigger to open the flap. This is it!

CANISTER-BAGGED

SILENT ENERGY

SMART POWER, INTELLIGENT CLEANING

-50% ENERGY SAVING

Silent Energy, thanks to the new Hoover technology, allows to save 50% of energy consumption during the daily cleaning activities, ensuring the best in terms of performances.

SUPER SILENT

The best in terms of performance, without compromising on noise: Silent Energy is super silent! It guarantees a noise level of only 69 dBA* in Silent Energy mode.

ELECTRONIC CONTROLS ON THE NAVIGATOR HANDLE

The exclusive Navigator handle allows to have all cleaning programs in your hand.

SILENT ENERGY

This program combines excellent performance with low energy consumption and low noise. Dust pick up on hard floor is up to 100%** with 50% energy saving compared to standard vacuum cleaners.

TURBO

For difficult surfaces, like moquette and carpets, this function guarantees maximum power up to 2200W* with 440W* of suction power.

SOFT

Ideal function for delicate surfaces like sofas or curtains.

POLISHER

POLISHER

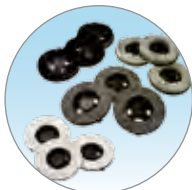

EXTREMELY DAZZLING

PAPER BAG

INTEGRATED VACUUMING FUNCTION WITH VIBRATING FRONT BRUSH

For easier and more comfortable dust removal on all surfaces. The front brush helps to collect the dirt, directing it towards the vacuuming part of the polisher.

COMPLETE SET OF PADS

The polisher is equipped with a complete set of pads that allow different uses.

BLACK SOFT BRISTLE BRUSHES: To apply floor wax. Suitable for all hard floors.

YELLOW HARD BRISTLE BRUSHES: To remove stubborn dirt. Particularly suitable for marble and tiles.

GREY BUFFING PADS: To polish with care. Suitable for all surfaces, especially marble and tiles.

NATURAL WHITE PADS*: Specifically designed to polish wooden floors.

FURNITURE GUARD

Soft rubberized bumper around the hood: to take care of your furniture.
